

ARCHITECTURAL **UPDATE**

CURATED CONTENT FOR PROGRESSIVE ARCHITECTS

Modern Swinging Doors

Part of the Marvin Signature™ collection, our Modern Swinging Door features the exacting principles and standards of true modern architecture, including under three-inch thin profiles, consistent narrow sightlines, and minimalist hardware.

Historic Retrofit Project

The Church in Sag Harbor, New York is a 12,000-square-foot former Methodist Church built in 1832, weathering nearly two centuries with its strong bones of vaulted ceilings and heavy beams. Architect Lee Skolnick of Skolnick Architecture + Design worked with artists and community activists Eric Fischl and April Gornik to transform The Church into a center for the arts. The result is an inherently unique adaptive reuse space that exudes a deep sense of history.
